PREFACE

Haryana is the fastest growing State in the country. Since 1966-67, there has been a considerable growth in almost all the sectors of the economy. The Industrial sector has registered an annual average rate of growth of 7.15 percent during 1966-67 to 1969-70. As a result, numerous Large and Small Scale Industries have come up in the State. It was, therefore, considered necessary to collect complete and up-to-date statistics regarding these industries for purposes of planning for future development.

Comprehensive statistics are already being collected every year through the Annual Survey of Industries in respect of factories registered under the factory Act, 1948. The non-registered sector had not been covered so far. To fill up this gap (though to a limited extent), the Government of India initiated a Centrally Sponsored Scheme in 1969-70 in all the States to collect necessary data of unregistered small scale industrial units employing 5 or more persons in the urban areas.

The scheme had a phased programme to be carried out during the Fourth Plan. To begin with, a census of all small scale industrial units in the un-organised sector, employing 5 or more persons was undertaken and some auxiliary information, like employment, power used, type of organisation, products manufactured etc., was collected. On the basis of this information, a district-wise and industry-wise Directory has been prepared. It is hoped that the Directory will prove useful to the planners, administrators and financial institutions for formulation of development/credit policies.

This Directory has been prepared by Shri C.P. Budhiraja, Research Officer, Industry Section of this Organisation under the supervision and guidance of Shri Amar Singh Sanghi, Deputy Economic and Statistical Adviser to Government, Haryana.

CHAPTER—I

INTRODUCTION

There is a growing demand for industrial statistics as they are essential for planning the industrial structure of the economy and for assessing the progress achieved therein at different points of time. Industrial Statistics like productive capital, employment, output, value added, installed capacity of production, man-days worked, earnings and social security benefits, raw materials consumed, additions to inventory and other capital transactions etc., are being collected through the Annual Survey of Industries carried out by Industrial Statistics Wing of the Central Statistical Organisation, Government of India. Coverage of this sector extends to the entire factory sector, (*i.e.* industries registered under the Factory Act, 1948) excluding factories under the control of Defence Ministry, oil storage depots and technical training institutes. Statistics for industrial units smaller in employment size and hence not registered under the Factory Act have not so far been collected in a comprehensive way. To fill up this gap, a Centrally Sponsored Scheme following a decision of the meeting of the Standing Committee on Small Industries Statistics held on the 28th February, 1969, was launched for the collection of statistics on Small Scale Industrial Units employing 5 or more persons in unorganised sector. In pursuance of this scheme, a complete listing of all the units in unorganised sector was done in the municipal areas of the State.

1.2 **Coverage and Scope of the Scheme**:—The coverage of the survey extends to municipal limits of 61 towns of the State. Within these urban areas, all those manufacturing establishments employing 5 or more persons which are not registered under the Factory Act, 1948 have been covered. In other words, establishments having employment of 5—9 persons and operating with the aid of power and those employing 5—19 persons operating without the aid of power but with an investment of not more than Rs 7.5 lakhs in plant and machinery have been listed.

1.3 **Period of Survey**:— Listing operation of industrial units was started in September, 1969 and was completed in all the towns of the State in March, 1970. The industrial units listed have not been uptodated and, therefore, the present Directory has been compiled from the data collected during that period.

1.4 **Method of Listing**:—A door to door visit was made by the Technical Assistants of this Organisation to list all such manufacturing units. Wherever any such manufacturing activity was noticed, a brief proforma with information like name of the unit, address, employment, investment in plant and machinery, industrial activity, type of organisation, financial requirement, power used etc., was filled-in. Data of these filled in schedules were processed and tabulated to prepare this Directory.

1.5 **Concepts and Definitions**:—The concepts and definitions in respect of items given in the Directory are as below :—

(i) *Manufacturing Activity*:—Manufacturing is transformation of raw material including repair work. All such activities which are covered under divisions 2 and 3 of the Standard Industrial Classification (including industrial servicing done for other persons/concerns) and are primarily for sale have been considered as manufacturing activities for the purpose of this survey.

(ii) *Employment* :—It relates to the average number of persons working per day. In working out employment, whole time workers like owner or proprietor, unpaid family workers, managerial, supervisory and clerical staff as well as apprentices either paid or unpaid have also been counted. Part time workers have also been treated as full time workers. The workers working on piece rate wages and the workers engaged through contractors and engaged in production directly within the premises of the unit have been included even through their wages and salaries have been paid trhough the contractors who supply labour in bulk to manufacturing units.

(iii) *Type of Organisation*:—It shows the organisation ownership of the manufacturing unit *i.e.* individual proprietorship, partnership; private/public limited company, public corporation, co-operative society etc.

(iv) *Power Used* :—Manufacturing establishments making use of power like steam engine, oil engine or electricity to drive the machinery was treated as 'with power' otherwise, they were treated as 'without power'.

1.6 **Tabulation and Coding**:—After listing of the units, industries were coded to the fifth digit level number as per classicfiation of industries. Where the products were such that more than one group was involved, the group taht commanded major share of products in terms of value, determined the industrial code for that establishment. The data have been tabulated industry-wise/district-wise upto 5th digit level.

MAIN FINDINGS OF THE DIRECTORY

The following aggregate position has emerged from the district-wise Directories of the small scale industrial units employing 5 or more persons in the unorganised sector.

Table 1 :—Distribution of Number of Units Classified by persons Employed and Financial Requirements

Sr. No.	District	Number of Units			Persons employed	Units requiring bank finance	Units which have already borrowed from banks or financial institutions
		With power	Without power	Total			
1	2	3	4	5	6	7	8
1	Karnal ..	250	520	770	6,028	530	36
2	Ambala ..	310	211	521	4,043	363	37
3	Gurgaon ..	253	261	514	3,571	368	32

	Total ..	1,183	1,557	2,740	19,411	1,853	186

2.1 The spatial distribution of units as reflected in the above table reveals that the largest concentration of units is in district Karnal followed by Ambala, Gurgaon, Hissar, Rohtak and Jind Districts. District Mahendragarh has the minimum number of units.

2.2 The total employment generated by these units is 19,411 giving an average employment of 7 persons per unit.

2.3 The percentage of units operated with power to total number of units is 43.2. District Ambala has the largest percentage (59.5%) of units operated with power. In district Jind and Gurgaon, approximately 50% of the units are using power whereas in the ~~remaing~~ remaining four districts, namely Karnal, Hissar, Rohtak and Mahendragarh, less than 50% units are making use of power.

2.4 Of the total 2,740 units listed in the State, a good number of 1,853 units (67.6%) have reported their requirement for bank finance while 701 units (25.6%) do not require any financial assistance. 186 units (6.8%) have already borrowed from the banks.

2.5 **Town-wise Distribution of Industrial Units**:—Of the 61 towns in the State, 12 important towns alone have as much high concentration of Industrial units as 68.10 per cent of the total units. These towns in the descending order of concentration of Units are Panipat, Rohtak, Ambala Cantt., Rewari, Faridabad (old and N.I.T.), Sonepat, Ambala City, Kaithal, Yamunanagar, Hissar, Jagadhri and Karnal, each having 450, 188, 178, 166, 160, 122, 119, 105, 104, 102, 99 and 72 units respectively. Out of the total 770 units in district Karnal, 450 units are located at Panipat, 105 units at Kaithal and 72 at the district headquarter. In Rohtak

district, the maximum concentration of units is at the district headquarter (188 units) and at Sonepat (122 units) which together constitute 77.8 per cent of the total units in the district. Four towns together, namely Ambala Cantt, Ambala City, Yamunanagar and Jagadhri account for 95.9 percent of the total units in Ambala district. In Gurgaon district, more than 50 percent of the total units are concentrated only in two towns of the district, namely Faridabad and Rewari.

2.6 **District-wise and Industry-wise Distribution of Industrial Units:—** District-wise and Industry-wise distribution of units is shown in Annexure-2. District Karnal having the largest concentration of 770 industrial units is dominated by the major industry group 23, 'manufacture of textiles' which accounts for 43.0 per cent of the total units in the district. Ambala district with a total of 521 industrial units has the largest concentration of major industry group 35, 'manufacture of metal products except machinery and transport equipment' followed by major industry group 39, 'miscellaneous manufacturing industries'. The major industry group 35, accounts for 17.7 per cent and the major industry group 39, 15.0 per cent of the total units in this district. District Gurgaon ranking third in respect to location of total units has the concentration of major industry group 20, 'food manufacturing industries, except beverage industries' which accounts for 18.1 per cent of the total 514 units of the district followed by major industry group 36, 'manufacture of machinery except electrical machinery' accounting for 15.0 per cent of the total units. The largest concentration of 26.8 per cent of the total 403 units in district Hissar goes to 'food manufacturing industries, except beverage industries' followed by 19.9 per cent in 'manufacture of footwear, other wearing apparel and made-up textile goods'. In Rohtak district, the highest concentration of 15.3 per cent of the total 398 units is found in the major industry group 24, 'manufacture of foot-wear, other wearing apparel and made-up textile goods'. Districts Jind and Mahendragarh each has a total number of 96 and 38 units respectively. Concentration of no particular industry is found in these districts.

2.7 **Industry-wise Distribution of Units and Employment:** — Annexure-3 gives industry-wise distribution of units and persons employed. The largest number of Small Scale Industrial Units listed in the Directory fall under the major industry group 20, 'food manufacturing industries, except beverage industries' followed by major industry group 23, 'manufacture of textiles' and major group 36,'manufacture of machinery except electrical machinery' accounting for 17.9 per cent, 16.2 per cent and 11.2 per cent respectively. Other relatively important small scale major industry groups are 'manufature of foot-wear, other wearing apparel and made-up textile goods' (having 10.3 per cent of the total units) and 'manufacturing of metal products except machinery and transport equipment' (7.5 per cent of the total).

It is worth noting that though the major industry group 20, 'food manufacturing industries, except beverage industries' dominates in respect of number of units yet it is not so important from the point of view of employment. Major industry group 23, 'manufacture of textiles' accounts for 20.6 per cent of the total employment while major industry group 20, 'food manufacturing industries, except beverage industries' provides 15.6 percent of the total employment. Other important major Industry groups in respect of employment are major industry group 36, 'manufacture of machinery except electrical machinery' and major industry group 35, 'manufacture of metal products except machinery and transport equipment' having 9.7 percent and 8.5 per cent respectivly of the total employment.

2.8 **Distribution of Units according to Ownership Organisation:—** Annexure-4 indicates that the most popular form of ownership organisation in this sector of industries is individual 'Proprietorship'. 'Partnership or Joint-Family Form of Organisation' has relatively a lesser significance than that of 'Ownership Form' as 36.8 per cent of the total units in the State are run on

'Partnership or Joint Family' basis as against 60.9 per cent under the 'Individual Proprietorship'. Other forms of organisation, namely Public/Private Limited Company, Public Corporation and Co-operative Society are not very popular among the small scale manufacturers of this sector as the proportions of units run under these forms are quite negligible. Of the total 2,740 units in this sector, only 8 units have been found under Private Limited Company, no unit under Public Limited Company and 2 units under Public Corporation. Co-operative movement has also not made any tangible impact in this sector as there are only 56 Co-operative Societies which constitute 2.0 per cent of the total units.

Industry-wise distribution of industrial units according to ownership organisation shows that a maximum of 18.8 per cent units out of 1,666 units operated under 'Individual Proprietorship' fall under major industry group 23, 'manufacture of textiles' followed by major industry group 20, 'food manufacturing industries, except beverage industries' and major industry group 24, 'manufacture of foot-wear, other wearing apparel and made-up textile goods' where the relevant percentages stand at 15.9 and 12.7, respectively. Partnership or Joint-Family system dominates in the major industry group 20, 'food manufacturing industries except beverage industries' as 22.0 per cent of the total 1013 units running under 'Partnership or Joint-Family' fall under this group. Next in rank are major industry group 36, 'manufacture of machinery except electrical machinery' and major industry group 23, 'manufacture of textiles', having 12.4 per cent and 10.5 per cent of the total units operated under this form of organisation. In the co-operative sector, a maximum number of 21 ~~20~~ units fall in the major industry group 23, 'manufacture of textiles' followed by 8 units each in major industry groups of 'manufacture of furniture and fixtures' and 'manufacture of machinery except electrical machinery'.

2.9 **District-wise and Industry-wise Distribution of Units according to Power Used:—** Annexure-5 reveals that, of the total 1,183 units using power in this sector, a maximum number of 310 units (26.9%) exists in Ambala district followed by 253 units (21.4%) in Gurgaon district, 250 units (21.2%) in Karnal district, 159 units (13.4%) in Rohtak district and 149 units (12.6%) in Hissar district. In major industry group 37, 'manufacture of electrical machinery, apparatus, appliances and supplies' 86.6 per cent of the total units in this group are making use of power. In major industry groups 28, 21, 30, 36, 39, 34, 38 and 35, the relevant percentages are 79.3, 75.0, 75.0, 74.6, 71.4, 65.0, 60.3, and 57.5, respectively. In major industry group 24, 'manufacture of foot wear, other wearing apparel and made-up textile goods' and major industry group 29, 'manufacture of leather and fur products except foot wear and other wearing apparel', the proportion of units using power to the total units in these groups is very meagre. In the former major industry group, only 18 units (6.3%) out of 283 are run by power and in the latter only one (4.0%) out of the total 25 units is making use of power. Major industry group 23, 'manufacture of textiles' too, does not have much units operated with power as only 13.5 per cent units in this group are run by power.

Power other than electricity is not popular in this sector as out of 1,183 units using power, only 9 units are making use of power other than electricity.

2.10 **Industry-wise Distribution of Industrial Units according to Employment-ranges:—** Annexure-6 presents data on district-wise and industry-wise distribution of industrial units according to employment-ranges. In the State as a whole as well as in all its districts, a very high percentage of industrial units is found in the employment range of 5—9 persons. In the State as a whole 88.0 per cent of the total units are in the employment range of 5—9 persons, 7.3 per cent in the employment range of 10—14 persons, 4.7 per cent in the employment range of 15—19 persons.
